CAREER OBJECTIVE

To pursue a Software Engineering role with strong foundations in Data Structures, Algorithms, DBMS, and Object-Oriented Programming, contributing to scalable and high-performance software systems through analytical problem-solving and efficient engineering practices.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering Expected 2027
Vignan Institute of Information Technology, Visakhapatnam
CGPA: 8.0 / 10

TECHNICAL SKILLS

Languages: Python, Java, JavaScript
Web Technologies: HTML, CSS, Bootstrap, React
Backend: Node.js
Databases: MySQL
Tools: Git, GitHub
Cyber Security Tools: Wireshark, Nmap
Core Concepts: Data Structures & Algorithms, OOP, DBMS, Computer Networks
DSA Topics: Sliding Window, Segment Trees, Dynamic Programming, Graph Algorithms, Greedy Algorithms

EXPERIENCE

Full Stack Developer Intern Dec 2023 – May 2024
PixelWind Technologies, Visakhapatnam, India

- Built a full-stack e-commerce web application integrating frontend, backend, and database components.
- Designed responsive user interfaces and implemented server-side logic for authentication and workflows.
- Enhanced application performance and ensured seamless user experience across devices.

PROJECTS

- **Distributed Cache Simulator with LRU Eviction** – Developed a Python-based distributed caching simulator implementing LRU eviction, consistent hashing, and optimized request distribution across multiple cache nodes to simulate scalable in-memory caching behavior for high-frequency requests.
- **Resume Intelligence Platform** – Developed and deployed an AI-powered resume analysis platform using Flask, Gemini AI, and semantic ATS scoring. Implemented resume parsing, technical skill detection, recruiter-style evaluation metrics, AI interview assistance, and responsive production-grade UI with live cloud deployment.
- **Myntra Clone E-Commerce Platform** – Developed a responsive e-commerce web application inspired by Myntra using React, Node.js, and MySQL. Implemented product catalog browsing, shopping cart functionality, user authentication, and seamless frontend-backend integration.

ACHIEVEMENTS

- **Full Stack Internship at PixelWind Technologies** - Delivered a production-ready e-commerce application over a 6-month internship.
- **Qualified & Presented at Smart India Hackathon (SIH) twice** (2022 & 2023) - Selected to present solutions in national-level hackathons among thousands of participants.

CERTIFICATIONS

OCI AI Foundations Associate (Oracle), NPTEL Cloud Computing, Ethical Hacking (EduSkills), Full Stack Internship Certification
